

# Envision Release 4.11.0.0 – Builders

## DCM: Options Pricing Report

We have added an Options Pricing Report to the Design Center Manager.

The report has many filters including the ability to run it for any inventory level within the division. The filters include: Room (if applicable), Category Group, Category, Option Type, Standard, Structural, and Cut-off Stage. The report includes the following data:

- Organized by Category
- Option Number
- Option Name
- Option Description
- Is it Standard?
- Is it Structural?
- Is it Financeable?
- **Price**
- Post Cutoff Price

## DCM/EDC: Ability to remove Category Image Gradient

This feature gives the ability to remove the gradient image from the category images display in EDC2.

**NOTE:** The category names are in white and the gradient is added to make the category name look consistent on every image. **This feature should only be used if dark category images are being used.**

### DCM – EDC Branding

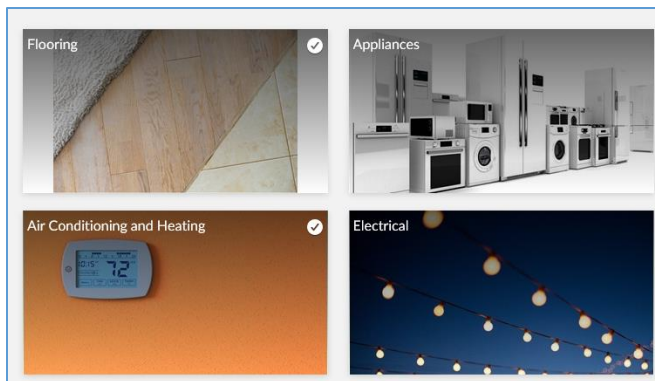

EDC Classic Edited Branding	EDC Classic Published Branding	<b>EDC Edited Branding</b>	EDC Published Branding	EDC Left Navigation	Custom Images	
-----------------------------	--------------------------------	----------------------------	------------------------	---------------------	---------------	--

Turn Off Gradient on category images ☐

### EDC – Gradient vs. No Gradient on Category Images

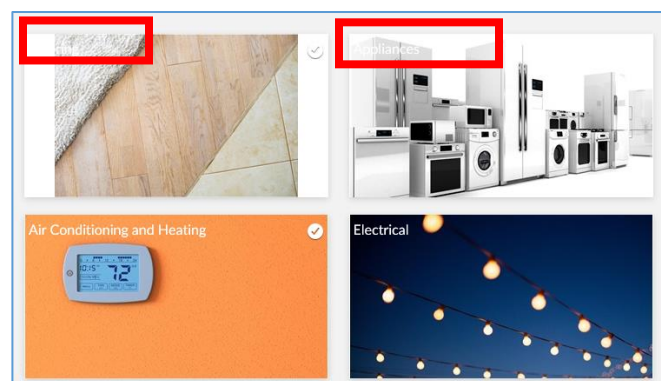

#### With Gradient

All Category Names are clear/consistent

#### Without Gradient

If images are light, lose the Category Name

## DCM/EDC: Close Categories by Default

A setting has been added to the DCM 'Manage Category Display' that will allow the default of a category to be closed. This can be used if there is a category (Example: Promotions) that you don't want the Buyer to be able to select items from, but also want them to be able to see those Confirmed Options.

### DCM – Manage Categories Setup

< Manage Category Display

Presales Printed Contract Addendum **Buyers**

All checked categories will display as closed in the EDC2.

- ☐ Flooring
  - ☐ Tile
    - ☐ Dark Tile
    - ☐ Light Tile
    - ☐ Blue tile
  - ☐ Carpet
    - ☐ Shag
  - ☐ Wood
    - ☐ OAK
    - ☐ Laminate

## DCM: Designer Collections Setup Enhancement

The Designer Collections setup has been enhanced to make it easier to assign options. On the Option Selection Tab, if the option exists in the community on at least one plan, it will display. Previously it would have to exist at EVERY plan at the level.

**Example:** Create a Designer Collection at the Community level. An option exists on 45/50 plans in that community. You no longer have to custom add this option to those 45 plan. You can add it once and that option will only display for the 45 plans it is assigned to.

< Edit Designer Collection: Option Selections

Veranda Collection

Status: **ACTIVE**  
Owner Level: COM  
Owner Name: Veranda 87

Option Customization

Step 3: Select the Universal options for this collection.

Note: Universal options are any options available on the associated plans; if an option doesn't exist on a specific plan, it will not display as part of the collection for that plan. Additional options can be added for specific plans on the Optional Customization tab. If you are a builder using intersections, please make sure to check the Optional Customization tab for any Postrequisite option(s). There is a maximum of 75 items allowed per collection to optimize performance and buyer experience.
